

Bhavani Prasad Sankara

Software Developer

Dynamic and creative full stack developer with 1 year experience. Passionate about building applications that solve real life problems. Developed more than 5 web apps and one mobile e-commerce application. Collaborated on 2+ projects on GitHub. In previous role, doubled code-efficiency and reduced site load time using best possible algorithms. Eager to offer superb analytical and code skills to help the company I work grow.

WORK EXPERIENCE

Software Developer

Jeevamrut

10/2021 - Present

Hyderabad

Achievements/Tasks

- It was a great opportunity for me to learn and implement my creative coding skills on live applications such as mainly Internal Dashboard for maintaining orders, vendors and support management where I used React, Spring Boot, AWS and MySQL.
- I've made use of React Redux for the state management which saved a lot of time by reducing end point calls and used Firebase for Authentication.
- I also developed a mobile application with Flutter.
- I contributed on many small projects that helped them scale their business.

Web Developer

GCE Solutions

07/2019 - 10/2019

Hyderabad

Achievements/Tasks

- I joined here as an Intern & there's no proper website for them, I suggested the best templates & designed many landing pages which landed them many clients.
- Though I used wordpress and many plugins for the site design, I've taken this opportunity to experiment with PHP, CSS, HTML, JS to make custom landing pages/plugins.
- I also worked with Woocommerce and helped them setup the entire Dashboard management including payment gateway, email marketing, chat bot and some other common applications.

EDUCATION

B.Tech. ECE

SASTRA University, Thanjavur

06/2015 - 07/2019

SKILLS

JavaScript	Java
HTML	CSS
MySQL	React, Redux
MongoDB	Spring Boot
Node.js	Git

PERSONAL PROJECTS

Swear On (05/2022 - Present)

- I was really looking for an app that charges me if I ever break a promise I made, I found none in the market hence I decided to create on my own.
- I've used React, Node, Express, MongoDB, JWT, Heroku and Git for developing this application.
- I completed payment gateway (RazorPay) integration with this app.
